## Quotes

### Backticks

```
**a** #pair ~of~ *backticks* <!--enclose--> <code> that cancels  
[most](special) [!characters]
```

```
`**a** #pair ~of~ *backticks* <!--enclose--> <code> that cancels [most](special) [!charact
```

use double backtick to escape a backtick

a single backtick is always escaped ```

a single backtick is always escaped ```

When trying to escape ``` inside backtick quotes, use double backtick to wrap it

When trying to ````escape ``` inside backtick quotes````, use double backtick to wrap it

use triple backtick to force verbatim

```
everything here _is_ *verbatim*, even double backticks `` or single backtick `
...
everything here _is_ *verbatim*, even double backticks `` or single backtick `
...
```

### Block quotes

a larger than symbol starts a block quote, whereas **styling** is still  
*available*

> a larger than symbol starts a block quote, whereas **\*\*styling\*\*** is *~still~* **\*available\***

### Code blocks

*Indent four spaces for code blocks.*

```
**like** *this* #most ~special~ *characters* <!--are--> <cancelled> [just](like) [!this]
```

## Unnumbered bullets

### Unnumbered bullet hello world

- bullet
  - point
- can
- be
- specified
- with
  - dash -
- or
  - asterisk \*

source code

```
- bullet
  - point
- can
* be
- specified
- with
  - dash -
- or
  * asterisk *
```

### deep unnumbered bullet list

- this
  - is
    - \* very
      - deep

source code

```
- this
  - is
    - very
      - deep
```

### asterisk \* and dash - are interchangeable

- asterisk \*
- and
- dash -
- can

- be
- mixed

source code

```
- asterisk *
- and
* dash -
* can
* be
* mixed
```

#### **four spaces of indentation**

- four spaces of indentation
  - is necessary
- while 2 spaces
- aren't enough

source code

```
- four spaces of indentation
  - is necessary
- while 2 spaces
- aren't enough
```

#### **separate two adjacent bullet lists**

Two bullet lists next to each other can cause rendering hiccups. It's better to put something in between.

## Numbered bullets

*pandoc starts the list with the first number, but retext and git@china always starts the list with 1*

### Numbered bullet hello world

1. numbered
2. bullets
3. looks
4. like
5. this

source code

1. numbered
2. bullets
3. looks
4. like
5. this

### The first number matters, but not the later ones

200. number
201. hello
202. hello

source code

200. number
0. hello
6. hello

### four spaces of indentation, the first number of a mini-list matters

1. four
2. spaces
  6. of indentation
  7. is recognized
3. the
4. second
5. number
6. onwards
7. within
8. the

- 9. same
- 10. level
- 11. is
- 12. ignored

source code

- 1. four
  - 3. spaces
    - 6. of indentation
    - 9. is recognized
- 0. the
  - 2. second
  - 4. number
- 0. onwards
- 0. within
- 0. the
- 0. same
- 0. level
- 0. is
- 0. ignored

### Deep numbered bullet list

- 0. this
  - 0. is
    - 0. very
      - 0. deep

source code

- 0. this
  - 0. is
    - 0. very
      - 0. deep

### mixed numbered and unnumbered bullet list

- 1. greetings
  - bonjour
  - bonsoir
  - bienvenue
- 2. food
  - fruits
    - pomme
    - orange

- fraise
- drinks
  - 1. eau
  - 2. vin
  - 3. lait

source code

1. greetings
  - bonjour
  - bonsoir
  - bienvenue
2. food
  - fruits
    - pomme
    - orange
    - fraise
  - drinks
    - 1. eau
    - 2. vin
    - 3. lait

***retext doesn't support this.***

~~crossover~~

**~~crossover~~**

## Line breaks

*git@oschina doesn't support this.*

2 trailing spaces acts as a line break  
like this.

2 trailing spaces acts as a line break  
like this. ^ notice the trailing spaces here

But normal line breaks won't work

But normal  
line breaks won't  
work

A completely empty line act as a hard line break,  
like this.

A completely empty line act as a hard line break,  
like this.

## Tables

First Header	Second Header
Content Cell	Content Cell
Content Cell	Content Cell

```
ignore this line
First Header  | Second Header
-----|-----
Content Cell  | Content Cell
Content Cell  | Content Cell
```
